

With over 25 years of experience and more than 30 executed microgrid projects globally, ABB is the leading provider of products and solutions across power generation, including renewables, ...

Microgrids are the answer for a more sustainable, resilient and digital energy. This power system concept represents the evolution of the new electrical distribution based on distributed energy ...

research centers operating in microgrid open-innovation. o Technology providers In addition to ABB smart power portfolio, there are strong connections with several other technology ...

"ABB is a pioneer in microgrid technology and providing uninterrupted power supply and reliable power is in line with our Next Level Strategy," explains Massimo Danieli, Managing Director of ...

Bringing a modern, sustainable technology solution to a historically significant site, ABB has provided a microgrid system to integrate solar energy and supply power to Robben Island, the place where Nelson Mandela spent 18 years in ...

ABB delivering stable, sustainable power: anytime, anywhere. The examples are plentiful: A microgrid is enabling energy self-sufficiency for an Alaskan island.. Microgrids have brought sustainable power to one of ...

ABB microgrid solution to boost renewable energy use by remote community in Kenya . Zurich, Switzerland, September 2, 2015 - ABB PowerStore™ technology to stabilize power supply ...

distances. Microgrid self-sufficiency is one of the technology's key value propositions: defined at a high level by Jon Jaeger, application engineer for ABB's microgrid group, as "islandable power ...

"ABB is a pioneer in microgrid technology and providing uninterrupted power supply and reliable power is in line with our Next Level Strategy," explains Massimo Danieli, Managing Director of ABB's Grid ...

Collaborations with ABB accelerate microgrid developments. ABB's digital technology and open innovation network plays vital role in rollout of smart energy distribution systems that are more resilient and sustainable. Click here to ...

ABB is entering into a strategic partnership with Direct Energy Partners (DEP), a start-up using digital technology to accelerate adoption of Direct Current (DC) microgrids. The partnership involves a minority investment ...
