

What type of energy is used in Algeria?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Algeria: How much of the country's energy comes from nuclear power?

Is Algeria a good country for electricity?

Algeria has the technical and financial capacity to meet the country's electricity needs, as well as the assets required for its energy transition. Significant efforts have been made to increase the production capacity, as evident in the development of the installed power generation capacity over the past decade.

Why does Algeria need more energy sales?

Algeria, conversely, is in desperate need of greater and diversified energy sales to bolster revenues, service its international image, and improve the efficiency of its own energy infrastructure to better meet rising domestic demand.

Can Europe make Algeria's Energy Evolution a green one?

Algeria's energy ministry hopes to distinguish itself from other providers and attract investment through its commitment to renewables. Europe therefore has an opportunity to develop a local ally to make Algeria's energy evolution a green one. Green hydrogen could be invaluable for both Algeria's and Europe's growing energy demands.

Should European governments support Algeria's Energy Transition?

European governments, especially those that need Algerian gas but have not yet engaged, should be encouraged by Algeria's 2019 hydrocarbons law, which created new, more liberal regulations for concessions and foreign oil and gas stakeholders. EU bodies could also play a major role in encouraging Algeria's energy transition.

What happened to Algeria's energy sector in 2014?

Since 2014, Algeria's energy sector has been in crisis. The sharp drop in oil prices that occurred in that year caused oil and gas exports to fall by 9% in quantity and 42% in value in the period between the first half of 2014 and 2015 (i.e. from USD 33.21 billion to USD 19.28 billion) (Cobo 2021).

The Algerian War lasted from 1954 to 1962. It brought down six French governments, led to the collapse of the Fourth Republic, returned de Gaulle to power, and came close to provoking a civil war on French soil. More than a million Muslim Algerians died in the conflict and as many European settlers were driven into exile. Above all, the war was marked by an unholy marriage ...
