

What is photovoltaic poverty alleviation (PVPA)?

Photovoltaic Poverty Alleviation (PVPA) projects, which utilize the subsidies and income from PV power to alleviate poverty in rural areas, are part of a comprehensive energy policy innovation in China. It is expected that the projects will deploy at least 10GW PV and benefit more than two million poor households in total by 2020.

What are China's photovoltaic poverty alleviation projects?

China's photovoltaic poverty alleviation projects (PPAPs) aim to help alleviate poverty by using the new energy power generation. In recent years, the PPAPs have flourished with the strong support of the Chinese government, becoming an integral strategy for the support of rural industries.

Does photovoltaic poverty alleviation policy reduce household energy poverty?

The impact of photovoltaic poverty alleviation policy (PPAP) on household energy poverty is empirically investigated. The panel data of a tracking survey from 2010 to 2018 is used, and the high-dimensional fixed effect model is employed. PPAP contributed positively to alleviating household energy poverty.

Can solar photovoltaic projects reduce poverty in rural areas?

Since 2013, China has implemented a large-scale initiative to systematically deploy solar photovoltaic (PV) projects to alleviate poverty in rural areas. To provide new understanding of China's targeted poverty alleviation strategy, we use a panel dataset of 211 pilot counties that received targeted ...

What is the work scheme on photovoltaic poverty alleviation project?

In 2014, the National Energy Administration and the State Council Poverty Relief Development Leading Group Office jointly issued The Work Scheme on Carrying out Photovoltaic Poverty Alleviation Project, dedicated to launching a nationwide PV poverty alleviation pilot project.

Does PV improve poverty alleviation?

The PV poverty alleviation effect is stronger in poorer regions, particularly in Eastern China. Our results are robust to alternative specifications and variable definitions. We propose several policy recommendations to sustain progress in China's efforts to deploy PV for poverty alleviation.

Based on 1251 household surveys collected in photovoltaic (PV) poverty alleviation areas in rural China, this paper explores the effects of PV cognition including ecological values, perceived ...

Downloadable (with restrictions)! Energy poverty is a serious problem worldwide and has attracted the attention of policymakers. As a type of social welfare project, photovoltaic poverty ...

DOI: 10.1016/J.ERSS.2018.04.035 Corpus ID: 170069877; Solar energy for poverty alleviation in China: State ambitions, bureaucratic interests, and local realities @article{Geall2018SolarEF, ...

Photovoltaic Poverty Alleviation (PVPA) projects, which utilize the subsidies and income from PV power to alleviate poverty in rural areas, are part of a comprehensive energy ...

PV poverty alleviation projects and 20% investment subsidies for large-scale ground power stations, while the central government will allocate initial investment subsidies according to the ...

Photovoltaic poverty alleviation is a significant way for regions rich in solar energy resources to transform the advantages of renewable energy resources into the driving force of ...

The use of solar energy has proven to be effective as a method of alleviating poverty in the past. In China, solar energy has provided power to more than 800,000 families living in poverty, and ...

China implemented a solar photovoltaic (PV) poverty alleviation (PVPA) policy of building nearly 0.24 million PVPA power plants in 2014-2020 to fight poverty. However, our current knowledge of its effects, ...

Researchers assessed the effect of solar energy projects on poverty in China and determined that PV systems can play a role in reducing multiple dimensions of poverty while ...

Our analysis revealed the co-benefits of emission-reduction and poverty alleviation, with PVPA policy boosting villagers' per capita net income by 2-3% in villages with PV plants. A nonlinear, inverted U-shaped ...

The solar energy for poverty alleviation program (SEPAP) in China aims to add over 10GW of solar capacity to benefit over 2 million citizens by 2020. SEPAP supports solar installations

Are photovoltaic panels poverty alleviation panels
