

Can Argentina transition to a low-carbon economy?

BUENOS AIRES, Nov. 3, 2022. Argentina can attain more robust economic growth by transitioning to a low-carbon economy, particularly transforming its energy and agricultural sectors, according to the World Bank Group's Country Climate and Development Report (CCDR) launched today.

Will Argentina be a key player in the energy transition?

Continuing to develop the great potential for renewable energies and investments in energy efficiency would be important during the transition. Moreover, lithium from Argentina could cover almost 20 percent of the global demand in 2030, making the country a relevant player in the energy transition.

Does Argentina have a green energy policy?

This approach is guided by the Hamburg Principles adopted by the G20 in 2017 and builds on the substantial experience across the institution. Despite large renewable energy resources, Argentina gets just 2 percent of its power from green energy.

What if Argentina doesn't reduce emissions from agriculture?

If Argentina does not act to reduce emissions from agriculture, 4 percent of its exports could be affected by climate regulations from other countries, which would mainly harm producers who do not implement sustainable practices. "Argentina is determined to increase its climate commitments and to transition to a low-carbon economy.

Is reducing air pollution a good idea for Argentina?

This is about 4 percent of Argentina's NDC commitment for 2030. Reduced air pollution also promises health benefits for the population. The energy is not only cleaner but also cheaper: the latest auction resulted in winning bids that are 41 percent below 2015 prices.

Is Argentina making an economic miracle?

Argentina: the making of an economic miracle? Governing with economic prudence has revived growth, says Javier Milei, president of Argentina Listen to this story. By the close of 2023 Argentina was teetering on the edge of a precipice, beset by a confluence of economic ills reminiscent of its most harrowing crises.

4 ???· Javier Milei swept to power in Argentina a year ago on a ticket to tackle chronic hyperinflation and overhaul the long-suffering economy. In one regard -- slashing the size of ...

The government of Argentina updated and published its latest Nationally Determined Contribution in October 2021, pledging not to exceed economy-wide net emissions of 359 million tonnes of carbon dioxide equivalents (Mt CO₂e) ...

Argentina ecoefficient solutions

Eco Green Energy is excited to announce the launch of our latest sustainable initiative of 60 solar carports installation in Argentina. This ambitious project features 1,050 EOS Poly 340W solar panels and generates a total capacity of 60 kilowatts. By transforming a commercial district into a renewable energy hub, we are enhancing energy efficiency and promoting environmental ...

Abstract The main conclusions of an analysis of low-CO₂, eco-efficient cement-based materials, carried out by a multi-stakeholder working group initiated by the United Nations Environment ...

We have pioneered eco-efficient solutions, such as the regenerative drive, standby solutions, and the revolutionary KONE UltraRope®; high-rise hoisting technology. KONE UltraRope® can cut the energy consumption of, for example, a 500-meter elevator ride, by up to 15%. For higher buildings, the energy saving is even more notable.

"Laura Kerr, from Ecoefficient Solutions recognised our solar potential and studied all available data and physical aspect of our site before presenting us with an exciting and cost effective proposal for us to consider. We have been very impressed with the professionalism and customer service throughout the whole process. Her belief and ...

One of the five CaaS Incubator companies, BGH Eco Smart (a unit of the BGH Group specialised in energy efficiency and smart building solutions), is bringing this pay-per-use business model to the Argentinean market to help upscale the use of climate friendly cooling solutions. In Argentina, buildings are responsible for 40 per cent of total ...

The complexity of the scientific challenges to develop eco-efficient solutions imposes necessarily the combination of a large variety of skills. We believe that only by developing a multidisciplinary and transversal teamwork approach ...

Argentina can attain more robust economic growth by transitioning to a low-carbon economy, particularly transforming its energy and agricultural sectors, according to the World Bank ...

Argentina has set a goal of establishing 20 percent renewable energy by 2025 and has committed to reducing carbon emissions by 30 percent by 2030. To meet these goals, the government, with support from the World Bank Group, has ...
