Does Armenia have solar power?

In June 2016, the Armenian Parliament updated the law "On Energy Saving and Renewable Energy" which encourages the use of solar power in the country and allows users of solar installations of 150 kW or less to sell their excess energy back to the electrical grid. The voltage in Armenia is 220 V AC at a frequency of 50 Hz.

Who is Omnis solar power?

Omnis Solar Power is a leading name in the global solar power sector, which is all set to attend the upcoming 2022 Intersolar South America exhibition from August 23rd - 25th at booth number F1.100. Omnis Power was founded in 2010 and has since grown to become one of the most innovative and dependable global manufacturers of solar products.

Who is omnispower?

Omnispower is a manufacturer of innovative solar modules. Our field of activity is the development of new technologies and extremely competitive products. High efficiency solar modules are the ideal solution for those who want uninterrupted and reliable energy production.

Why did Omnis Power Invest in Europe?

Due to the energy crisis and the clear need for energy transformation, Omnis Power started investing in the European market. In 2024, the first photovoltaic module factory with a production capacity of 500 MW per year will be opened in Italy. The production lines will be very modern, fully automated, and robotic.

What voltage does Armenia use?

The voltage in Armenia is 220 V AC at a frequency of 50 Hz. Armenia uses the European 2-pin C-socket and F-socket plugs. According to International Energy Agency in 2015 electricity generation in Armenia increased since 2009 to nearly 8000 GWh, but still remains below 1990 levels.

How much electricity is generated in Armenia?

As of the 1 January 2018, electricity was generated by 184 small HPPs, with total installed capacity of 353 MW. In 2017 the generation of the electricity from small HPPs was around 862 million kW\*h, which is about 11% of the total generated electricity in Armenia (7762 million kW\*h).
