

# Aypa power Ghana

What does aypa power do?

Aypa Power develops, owns, and operates utility-scale energy storage and hybrid renewable energy projects that assist in the decarbonization of our grid. As an independent power producer, our company was founded with the purpose of reducing our reliance on fossil fuels.

Can aypa revolutionize the way we power our communities?

Together, we can revolutionize the way we power our communities. Aypa is a pioneering developer, owner, and operator of energy storage and renewable hybrid projects.

What makes aypa a great company?

We value our team members for their unique talents and abilities, and we embrace and encourage their differences in every aspect of their work -- our people are the foundation of our success. Aypa is a pioneering developer, owner, and operator of energy storage and renewable hybrid projects.

Is aypa a Blackstone Company?

Aypa is a Blackstone portfolio company with approximately \$1 Trillion of assets under management and the company's leadership has collectively developed, contracted and constructed over 8,000 megawatts of thermal, renewable and storage projects across Canada and the United States.

What does aypa stand for?

Aypa (pronounced as 'ai-pa'), is derived from the word for earth in the Indigenous Quechuan language of the Andes. It represents our commitment to creating a greener, more sustainable planet for generations to come. We have a proven history of financing, developing, owning, and operating battery energy storage and hybrid projects.

What type of battery does aypa use?

Aypa uses lithium iron phosphate (LiFePO<sub>4</sub> or LFP) batteries in its BESS designs. This type of battery chemistry utilizes iron phosphate as the cathode material and has several advantages over other lithium-ion chemistries, including high thermal stability, current handling capability, and long cycle life.
