Azerbaijan seeks to establish itself as a major actor in the global energy transition space as it prepares to host the 2024 United Nations Climate Change Conference (29th Conference of the Parties, COP29) in Baku, on Nov. 11-22. Through a number of international partnerships -- including joint ventures with Masdar to build 1 gigawatt (GW) of solar and wind ...

Azerbaijan's economy has long been centered on its hydrocarbon sector. The world's first industrial oil well was drilled in 1847 at Bibi-Heybat on the outskirts of Baku; by the turn of the twentieth century, Azerbaijan was producing over half of the world's oil. The Soviet period, Baku continued to be a major supplier of oil--though production declined in later years.

In 2021, Azerbaijan's president Ilham Aliyev designated Nagorno-Karabakh a "green energy zone" and announced investments into predominantly hydro, but also wind and solar power plants.

Yet Azerbaijan's renewable energy portfolio does not merely eye an internal audience, it also has an international dimension. Azerbaijan approved the United Nations Framework Convention on Climate Change (UNFCCC) in 1995 and the Kyoto Protocol in 2000. The country joined the Paris Climate Agreement in 2016 and committed to
