This usage depends on the size of the space. 1250 watts is all that is needed for a 14000 BTU air conditioner. A 1000-watt generator can run a small to medium-sized window unit without any issues. A large window unit will require at least a 2000-watt generator. A larger generator can be a better option to power many appliances simultaneously.

Backup solar generators can typically power at least 1,000 watts, which should be enough to power appliances like small lights, a fridge, or a television. However, if you need whole-home power or need to turn on devices ...

The battery capacity is a crucial factor. If the generator has a 1000-watt-hour (Wh) battery capacity, it can theoretically power a 1000-watt device for one hour, a 500-watt device for two hours, and so on. However, real-world factors such as battery efficiency and losses in the inverter can affect these estimates.

We like the FlashFish 300W solar generator for the pure value you get from this little unit. It's budget-friendly, super portable, and you can get a surprisingly long draw time from a single charge. While you aren't going to get days of power out of this small device, you can use it with a mini-fridge for up to seven hours with its 222 Watt-hour capacity.

The reason why it becomes the number #1 choice for 1000 watt solar generator, is that it is the lightest solar generator (22lbs/10kg) with a massive 1000-watt hour lithium-ion battery and the highest solar input capacity, that is 800 watts. Read full review....
