Best solar system in Thailand

Solarvest is a leading clean energy expert with a multi-national presence across in seven Asia-Pacific countries. Originating in Malaysia, the company started as a one-stop solar photovoltaic (PV) system solution provider for residential, commercial, industrial, and utility-scale solar farms.

OPEN LOOP SYSTEM . Open-loop systems or Thermosiphon solar heating system is both simple and economical. . The solar collectors located on the roof. No pumping is required as the hot water naturally rises into the tank through Thermosiphon flow rule. They are best suited for warm regions, because they operate with potable water only.

A 2kW solar panel system typically consists of 6-8 solar panels (depending on panel quality) and has a surface area of 10-15m². A 3kW system typically consists of 8-12 solar panels and covers a surface area of 15-20m². Because a 5kW system typically consists of 15-20 panels, the total rooftop space required for a 5kW system is between 25 and 35m².
