

Las características del parque. Según informe de ENGIE Chile, este nuevo parque de baterías tiene una capacidad de almacenamiento de 638 MWh, con 139 MW de capacidad instalada. Su tecnología es en base a Battery Energy Storage System (BESS) y utiliza baterías de litio para almacenar la energía renovable generada por el Parque Fotovoltaico PV Coya (180 MWac), ...

BloombergNEF has developed a tiering system for battery cell makers and system integrators. Based on bankability as evidenced by deployment, the system is designed to create a transparent differentiation between the ...

The global energy storage market is growing faster than ever. Deployments in 2023 came in at 44GW/96GWh, a nearly threefold increase from a year ago and the largest year-on-year jump on record. BloombergNEF expects ...

A large-scale hybrid project has been connected to the grid in China, combining BESS and supercapacitor technology to provide numerous services to the grid including black start. Origin energises the first stage of ...

Bess Freedman, Brown Harris Stevens CEO, says real estate has come back in New York City with a vengeance, but she says rising inflation "is not ideal." She is on "Bloomberg Surveillance." (Source ...

Rystad expects annual BESS deployments to grow by an average CAGR of 33% between 2022 and 2030, across all market segments including residential, commercial and grid-scale. From 43GWh of deployments last year, the firm is anticipating some 421GWh of new capacity to come online in 2030. In MW terms, 2030 will see 110GW deployed, indicating ...

The falling costs of grid-scale battery energy storage system (BESS) technology, a topic that has been much discussed recently on Energy-Storage news, will support growth, BNEF said. It found that as of February ...

Lab testing of battery cells. Supply chain constraints may not ease until well into 2023, BloombergNEF said. Image: TWAICE. The global energy storage market will grow to deploy 58GW/178GWh annually by 2030, with the US and China representing 54% of all deployments, according to forecasting by BloombergNEF.

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in real-world sector and country transitions, it provides an independent set of credible scenarios covering electricity, industry, buildings and transport, and the key drivers shaping these sectors until 2050.

Bloomberg boss Dominica

The prime minister of Dominica stood in his office atop the country's main government complex, ready to explain how he was making his tiny Caribbean nation the world leader in rebounding from ...
