Marmon IEI's data, voice, and network cables are leading the specialized cable industry in major rail transit datacom projects. Our HUB-Link® product line has worked on several projects that include the Silver Line Dulles Metrorail, HART elevated rail line, Santa Clara Valley BART Extension (SVBX), New York City 53rd Street Tunnel, and many more.

HUB-Link® provides an array of cables for telecommunications, data communications, and signal applications. These cables supply the medium to transmit analog and digital data at low voltage power to support various telephone circuits and general communication services throughout the transit infrastructure, as well as other outside and tunnel applications.
