Audi and RWE are breaking new ground together to drive the energy revolution forward - RWE has brought an energy storage facility on stream in Herdecke, Germany, that uses used lithium-ion batteries from Audi electric cars. With the help of 60 battery systems, the new type of storage facility on the site of RWE's pumped-storage power plant on Lake Hengstey ...

RWE expects to begin marketing the storage capacity of its second-life battery storage system from the beginning of 2022, initially to help maintain the frequency in the electricity grid. The plan is then to test other marketing methods on a flexible basis. RWE intends to draw on the insights gained from the reference storage system in Herdecke to

With the help of 60 battery systems, the new storage facility on the site of RWE's pumped storage power plant at Lake Hengstey will be able to temporarily store around 4.5 MW of electricity, the company announced. Audi previously used the decommissioned batteries provided for the project in E-Tron development vehicles.
