

Can I report the installation of photovoltaic panels

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Do solar panels need planning permission in the UK?

In the UK, the installation of solar panels is subject to both planning permission and building regulations approval. While planning permission focuses on the aesthetics and impact of the installation on the local environment, building regulations primarily deal with the technical aspects of the installation.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do solar panels need Building Regulations approval?

Building regulations approval is mandatory for solar panel installations in the UK. The approval process ensures compliance with safety, structural, and electrical standards. It verifies that the installation is carried out by competent installers and that all relevant regulations are adhered to.

Can solar panels be installed on a roof or wall?

The installation of solar panels on a roof or wall of a private house is considered to be permitted development (i.e. doesn't require planning permission) provided that: Panels should not be installed above the ridge line and should project no more than 200mm from the roof or wall surface on pitched roofs.

Why do solar panels need building regulations?

Compliance with building regulations helps protect the integrity of the building, ensures electrical safety, and minimizes the risk of accidents or damage caused by improper installation. In the UK, the installation of solar panels is subject to both planning permission and building regulations approval.

To install solar panels on most roofs you don't need planning permission as they are often covered by permitted development rights. The rules apply to both solar thermal panels and solar PV. However, permitted ...
