Can a reinforced concrete block support a solar panel above ground?

In areas where penetration of the ground is difficult or restricted for archaeological or safety reasons,our reinforced concrete blocks are the perfect solution,providing ballast to support these solar panels above ground. Our solar panel ballast blocks are designed to provide support to multiple panels.

Should I use precast concrete ballast blocks for my solar panel project?

Choosing to use our precast concrete ballast blocks for your solar panel project can provide you with added flexibility. Ballast blocks can be used on flat commercial-style roofs,where it is not possible to penetrate the roof surface,and are simpler to install than penetrating systems.

Why should you install a solar panel bracket?

The purpose of installing the bracket is to better fix the solar panel. If there is a more convenient and feasible method to fix the solar panel. PVMars will definitely recommend it to you,and effective solutions are based on solar panels' characteristics and your on-site installation environment.

Can a concrete base support solar panels?

An example of free-standing concrete bases being used to support solar panelscan be seen at Wellingborough solar farm. Due to an archaeological restriction on part of the land,our bespoke division manufactured 275 reinforced concrete blocks,this allowed a group of panels to be erected without the need for excavation.

Can a block be used to support solar panels?

An environmentally friendly solution,using blocks instead of penetrating the land means a field can be quickly returned to agricultural use if required. An example of free-standing concrete bases being used to support solar panelscan be seen at Wellingborough solar farm.

What are solar panel ballast blocks?

The solar panel ballast blocks provide a non-invasive,stable base to secure solar farm panels to. The flexible mould system used for casting the prestressed blocks enables for the solar panel bases to be cast in any size to suit the dimensions of the specified solar modules.

Types of Solar Panels Brackets. There are different types available, including railless brackets, and top-of-pole mounts, the specific type of bracket or clamp chosen depends on factors such as the dimensions of the ...

A concrete pier block with a metal bracket is a type of precast foundation system that consists of a round or square solid concrete block and a mounting bracket made from hot-dipped galvanized steel. The combination of ...
