

Chiba solar Bouvet Island

What is Cabot's Chiba solar farm?

Cabot Corporation CBT has announced the acquisition of Shoko Co.,Ltd.'s Chiba solar farm. The solar farm is adjacent to Cabot's carbon black manufacturing facility in Chiba, Japan, and will allow it to export solar power as renewable energy to the region's electrical grid.

How does Chiba solar farm work?

The Chiba solar farm generates up to 3,500 megawatt-hours (MWh) per year of electricity, which is equivalent to powering over 700 homes in Japan annually. The acquisition supports the company's sustainability strategy as the solar farm is an investment in renewable energy.

Did Cabot buy a solar farm in Japan?

US specialty chemicals and performance materials firm Cabot Corp (NYSE:CBT) has acquired a solar farm in central Japan, which generates up to 3.5 GWh of electricity annually, from local chemicals, synthetic resins and metals distributor Shoko Co Ltd. The amount of the investment made remained undisclosed.

Can Cabot export solar power to Japan?

The Chiba-based site is adjacent to Cabot's carbon black manufacturing facility in the city and will allow the US firm to export solar power to the electrical grid in the region, a statement said on Thursday. The acquired asset produces electricity enough to power over 700 homes in Japan yearly.

Bouvet Island (/ ˈ b uː v eɪ / BOO-vay; Norwegian: Bouvetøya [3] [bʰvèː;oeʔʔ]) [4] is an uninhabited subantarctic volcanic island and dependency of Norway is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island. Located north of the Antarctic Circle, Bouvet Island is not ...

L'isola Bouvet si trova a una latitudine di 54°26' S e a una longitudine di 3°24' E. Occupa una superficie di 58,5 km², ed è quasi interamente coperta da ghiacciai. Non ha porti né approdi, solo ancoraggi al largo, ed è difficile da approcciare. I ghiacciai formano uno spesso strato di ghiaccio che si getta con alte pareti nel mare o sulle spiagge nere di sabbia vulcanica.

The project was initially started by the Public Enterprises Agency of Chiba Prefecture as it was seeking companies to help reduce its burden on the environment. Including the 13.7MW solar plant at Yamakura, the JV has built 61 solar power plants across Japan since its formation.

La isla Bouvet (en noruego: Bouvetøya) es una isla subantártica, volcánica, casi completamente cubierta por glaciares y deshabitada. [2] Se encuentra localizada en el océano Atlántico Sur, unos 1750 km al norte de la Antártida, 1900 km al este de las islas Sandwich del Sur y 2520 km al suroeste del cabo de Buena Esperanza (en Sudáfrica), por lo que se la considera la isla ...
