

China Southern Power Grid Small and Micro Enterprises

How much has China Southern power grid budgeted in 2024?

China Southern Power Grid, one of two state-owned grid companies, has budgeted 173 billion yuan (US\$24 billion) for capital expenditure in 2024, up 23.5 per cent year on year and a significant acceleration compared with a 12.1 per cent increase in 2023, state media outlet People's Daily said.

How many kilowatt-hours does China Southern power grid use?

China Southern Power Grid said the five regions that it covers have consumed 540 billion kilowatt-hours of clean energy during the first nine months, with the renewable energy generation efficiency reaching 99.81 percent, up 0.22 percent year-on-year. Newly added installation of new energy reached 3.31 million kW.

Where is China Southern power grid?

Why is China's power grid equipment sector booming?

China's power grid equipment sector is set to boom as state-owned utility firms boost spending amid rising electricity demand and a renewed call from Beijing to better incorporate the country's record-breaking renewable energy generation capacity into the power system.

How much will China's power grid invest in 2021-25?

State Grid Corp of China, the largest power provider in the country, also pledged to invest 2.23 trillion yuan in the power grid, which means the country's total grid network investment will soar to 3 trillion yuan during the 2021-25 period. Both companies vowed to increase power supplies while implementing power price reforms.

How much will China spend on the grid in 2024?

China's capital expenditure on the grid will rise at least 7 per cent year on year in 2024 to 565 billion yuan, including 230 billion yuan for ultra-high-voltage projects, Citi said. However, the sector has less competition and therefore a lower risk of the overcapacity seen in China's solar panel and wind turbine sectors, according to Daiwa's Ip.
