Why did China Southern power grid release a white paper in Guangzhou?

On May 15, China Southern Power Grid released the white paper of action plan of China Southern Power Grid for the construction of new power system (2021-2030) (hereinafter referred to as "white paper") in Guangzhou, and held an expert seminar on digital grid to promote the construction of new power system.

How many kilowatts will China Southern power grid put into operation?

According to the white paper, during the "14th five year plan" and "15th five year plan", China Southern Power Grid will put into operation 5 million kilowatts and 15 million kilowatts of pumped storage respectively, and put into operation 20 million kilowatts of new energy storage respectively.

Does China's Southern Power Grid have a digital power network?

"China Southern Power Grid also has two major pilot projects on power trading in Guangdong and Yunnan provinces, which provide both challenges and opportunities for the country's in-depth digitalization of its power networks," he added.

Does China have a digital power grid?

[Photo provided to China Daily] China Southern Power Grid has pledged to continue investing in digital power grid construction, including a digital grid across Guangdong, Yunnan, Guizhou and Hainan provinces and the Guangxi Zhuang autonomous region.

Why is China Southern power grid developing a trading mechanism?

China Southern Power Grid is developing a trading mechanism to adapt to the participation of emerging market entities such as pumped storage, new energy storage and virtual power plants, designing flexible and diversified market demand response trading modes, and promoting the market construction of demand response in five southern provinces.

Will a digital power grid help China achieve a carbon peak?

A digital power grid will better facilitate the consumption of power increasingly produced by clean energy while further facilitating China's ambition to achieve a carbon peak by 2030 and carbon neutrality by 2060, he said.

Aimed at promoting the digital transformation of China Southern Power Grid Corporation and supporting the implementation of R46 standard in China, the smart low voltage distribution grid ...

Abstract: Aimed at promoting the digital transformation of China Southern Power Grid Corporation and supporting the implementation of R46 standard in China, the smart low voltage distribution ...

2013-2014, Long term renewable energy accommodation assessment in China Southern Power Grid. China Southern Power Grid Company (Participator) 2012-2013, Key technology to construct large-scale power grid. State Grid of China ...

Acrel Co., Ltd., as a Chinese power meter manufacturer, provides smart power meters and systemic solutions of energy efficiency management and electrical safety for users. [Click here ...](#)

The methodology of WATSR has been successfully implemented in the China Southern Power Grid, which is known as one of the largest alternating current/direct current parallel transmission system in the ...

Smart electric meters are primarily promoted by State Grid and China Southern Power Grid via unified bidding with the former holding the lion's share. State Grid invites smart electric meter ...

China's hydropower, with a total installed capacity of over 390 GW, is currently considered to be the most reliable flexibility resources to support the grid integration of wind ...

The installed capacity of new energy in provinces of Guangdong, Yunnan, Guizhou, Hainan, and Guangxi Zhuang autonomous region totaled 145 million kilowatts, surpassing coal-fired power for the ...

The application during the icing season of 2009-2012 in China shows that the dc de-icing method is an effective means to prevent an ice disaster in the power grid. Six-pulse ...
