

British Columbia has some of the cleanest and lowest-cost grid-supplied electricity in North America. Most of the generation (production of electricity) comes from facilities in the northern and southern Interior of B.C., while most of the load (consumption of electricity) is in the Lower Mainland and Vancouver Island.

The government has entered into a 25-year contract with Pike Corporation, through its Bahamian management company Island Grid Solutions, for the upgrade and management of Bahamas Power and Light's (BPL) transmission and distribution network, Minister of Energy and Transport JoBeth Coleby-Davis said yesterday.

OverviewResponsibilitiesElectricity supply and demandAccess to electricityService qualityRenewable energy resourcesHistoryTariffs and subsidiesColombia has had a liberalized energy market since 1995. The sector is characterized by an unbundled generation, transmission, distribution, and commercialization framework. The structure of the Colombian energy market is based on Laws 142 (Public Services Law) and 143 (Electricity Law) of 1994. The Ministry of Mines and Energy is the leading institution in Colombia's energy sector. Within the Ministry, the Unit for Mining and Energy Planning (UPME) ...

Island Power Producers, on its website confirmed that it aims to develop a 60 MW natural gas combined cycle power plant. "Island Power Producers was established to build and operate a state-of ...

Nearly a century later, there are still signs of multinational fruit companies desire to control land, economic power and social structures. Through the collective efforts of farmers and the Fairtrade International system, we ...

Acolgen is Colombia's principal association of power producers. It is composed of fifteen of the largest electricity generators including EPM, Isagen and AES Colombia. Combined, Acolgen members represent around 70% of the ...

Nearly a century later, there are still signs of multinational fruit companies desire to control land, economic power and social structures. Through the collective efforts of farmers and the Fairtrade International system, we work to reduce these long-standing injustices and put the power back into the hands of the growers.

Island Power Solutions develops tailor-made solutions for off-grid systems combining green energy production and storage. At Island Power Solutions we work closely with partners and local communities all to create efficient systems that help islands effectively access all their resources to generate cleaner and reliable energy.

Distributed energy resources, microgrids, and virtual power plants can play a key role in this transition and have already been successfully implemented on some islands. Increasing ...

The power grid of Vancouver Island is owned and operated by BC Hydro, and is connected with that of the Mainland of British Columbia by high voltage AC submarine cables, and formerly by a DC submarine cable system. [1]These links, which all consist of overhead line sections on land together with submarine cables are: Two parallel 500 kV AC circuits from south of Powell ...

Independent power producer (IPP) projects have had a significant presence in British Columbia since the 1980s. Their relationship with BC Hydro grew from the province's need to supply growing energy demands and implementation of the 2002 Energy Strategy, which mandated that BC Hydro would purchase its energy supply from IPPs rather than generating the supply itself.

Mainstream commercialised its first development in Colombia by signing a deal to supply 180 Gigawatt hours of clean energy each year in a private power purchase agreement (PPA) with Air-E. Mainstream was one of four companies awarded a contract as part of the competitive auction run by Air-e, in which Mainstream secured 50% of the total ...

The purpose of this Part is to assist consumers in making an informed choice of a nonregulated power producer. It does so by imposing a series of regulatory requirements upon the electrical generation and distribution industry for the protection of consumers, including specifying a variety of consumer information
