Soviet topographic map. Jan Mayen consists of two geographically distinct parts. Nord-Jan has a round shape and is dominated by the 2,277 m (7,470 ft) high Beerenberg volcano with its large ice cap (114.2 km² or 44 sq mi), which can be divided into twenty individual outlet glaciers. The largest of those is Sørbrreen, with an area of 15 km² (5.8 sq mi) and a length of 8.7 km (5.41 mi).

Described as one of the most remote islands in the world, Jan Mayen lies between Norway to the east and Greenland to the west. It is a rugged volcanic island 34 miles long and is made up of two parts - the larger section to the north (Beerenbeg Volcano) and the longer but narrower section to the south. A mile-wide isthmus links these two parts.

With a little preparation, you can confidently call Svalbard and Jan Mayen. Remember your exit code, Svalbard and Jan Mayen country code 47, and find the right area code. Explore our resources for seamless international communication.
