

What are Cyprus' energy goals?

For the heating and cooling sector, Cyprus foresees a target of 39.4%. In the transport sector, Cyprus plans to achieve 14% share of renewable energy by 2030. Cyprus supports PV and biogas/biomass for electricity production, while it also leans on onshore wind to achieve RES targets.

How does electricity work in Cyprus?

Electricity in Cyprus is managed by the Electricity Authority of Cyprus. Power is primarily generated at three fuel oil-burning stations but the use of distributed renewable energy is expanding. About 97% of the primary energy use was imported in 2008.

How does Cyprus support the energy sector?

For the heating and cooling sector, Cyprus supports solar thermal and use of heat. Finally the transport targets are planned to be met through electrification of transport and use of biofuels.

What type of energy is used in Cyprus?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Cyprus: How much of the country's energy comes from nuclear power?

What is Cyprus' RES target for 2030?

According to its Integrated National Energy and Climate Plan, Cyprus aims to achieve at least 22.9% renewable energy (RES) in final energy consumption by 2030. Although the RES share in the electricity sector was only 9.8% in 2019, Cyprus intends to increase the share of renewables in the electricity sector to 30.3% by 2030.

Will Cyprus increase its energy consumption in 2030?

The proposed contribution to the EU energy efficiency target would actually allow Cyprus to increase its primary and final energy consumption in 2030 by 3.1% and 18.8% compared to 2017 levels, respectively. This would go in the opposite direction of the collective EU effort on energy efficiency.

Cyprus Energy offers a featured list that aims to showcase some of the Best Energy Companies in Cyprus in which solar panels is the most common method of utilising solar energy in homes for the past 50 years. Recently though the use ...
