

Eskom solar households pricing changes New Zealand

Will Eskom's radical electricity pricing changes affect solar power?

Eskom's proposals for radical electricity pricing changes would result in many households with lower consumption -- including those with solar power -- paying substantially more for electricity than they do now.

Will rooftop solar change NZ's Electricity Market?

NZ's electricity market is a mess. Rolling out rooftop solar would change the game. Wholesale prices in the New Zealand electricity market have soared over recent weeks, climbing as high as NZ\$1,000 per megawatt hour. North Island pulp and paper plants have temporarily closed down because of the spike in costs.

Will solar power be able to meet peak electricity demand in New Zealand?

Even though solar power's peak generation around midday does not align with peak electricity demand in New Zealand, every small solar system connected to the grid contributes. At the national scale, the water flowing into hydro lakes could be held back in the dams to meet evening peaks in demand when solar is no longer available.

Will wholesale electricity price volatility persist in New Zealand?

Wholesale electricity price volatility, with some periods of low prices and others with high prices, is expected to persist as New Zealand transitions to a highly renewable electricity system. Periods with abundant water, wind and sunshine will see extended periods of low wholesale electricity prices.

How will Eskom's proposed pricing changes affect Homepower 4 users?

The graph below shows how Eskom's proposed pricing changes will impact the monthly bills of Homepower 4 users. Eskom's typical residential user with consumption of 700kWh or less will have a significantly higher electricity bill under the utility's proposed retail tariff plan.

Could rooftop solar help solve New Zealand's soaring electricity prices?

Analysis: New Zealand's soaring electricity prices reveal a broken system--rooftop solar could help, says Stephen Poletti. Analysis by University of Auckland Associate Professor, Energy Economics, Stephen Poletti, Victoria University Energy Policy Centre Professor Bruce Mountain and Victoria University of Wellington visiting scholar Geoff Bertram.
