

What is solar energy used for in Finland?

Solar energy in Finland is used primarily for water heating and by the use of photovoltaics to generate electricity. As a northern country, summer days are long and winter days are short. Above the Arctic Circle, the sun does not rise some days in winter, and does not set some days in the summer.

Should Finland invest in solar energy?

While the enthusiasm for solar in Finland is undeniable, question marks hang over the viability of rapid, profit-focused development. The solar energy sector requires substantial investment and expecting quick returns may not align with the realities of the industry.

Does Finland have a solar market?

Solar energy is more and more becoming an integral part of the energy palette globally and in Finland - the solar market in Finland is growing and subsequently the business potential associated to it. At the same time Finland has technologies and capabilities that enable business in the European and global solar energy value networks.

How much solar power does Finland produce in 2022?

The Finnish Energy Authority states that in 2022, solar power production amounted to nearly 635 megawatts - more than a 240 megawatt increase compared to the previous year. Finland still produces fairly little solar electricity compared to leading European countries. The Netherlands, in contrast, produce over seven times more per capita.

How much does solar electricity cost in Finland?

electricity spot price in Finland 2019 was 44,04 EUR/ MWh<sup>9</sup>. If solar electricity is utilized on-site, distribution costs and electricity taxes are avoided, which increases the benefits of PV consumption. Installed solar thermal capacity was 40 MW<sup>10</sup> at the end of year 2018.

Does Finland have a solar energy value network?

At the same time Finland has technologies and capabilities that enable business in the European and global solar energy value networks. There is a need to look at the solar energy market and value network in Finland to determine its strengths and weaknesses.
