Can franklinwh power a home?

Beyond supporting a home's main panel, FranklinWH offers a key industry first: The ability to power and control up to three additional large loads, including such things as HVAC, pool heating, and electric vehicle charging. With the capability to scale up to 15 units for a total of 204 kWh, we deliver more to power people's home and life.

Is franklinwh a brighter energy-independent company?

"We are committed to a brighter, energy-independent future, driven by a steady pipeline of product innovations," said Gary Lam, Co-Founder and CEO of FranklinWH.

What technology does franklinwh use?

FranklinWH uses built-in adaptive learning algorithms for smart storage and maximum home comfort. This technology allows our cloud-based control system to manage the most complex load scenarios, optimizing charge to secure and protect critical appliances while keeping loads safe and balanced.

A home energy storage system stores heat or electricity locally when it is readily available for later consumption. The most common types of energy storage systems are electric batteries, heat batteries, and thermal storage systems. Home energy storage systems store generated electricity or heat so that it can be used when needed at a later time.

This substantial energy storage capability allows homeowners to store more solar energy or off-peak grid power, providing extended backup during outages or enabling longer periods of energy independence. But capacity alone isn't enough - the aPower 2 complements this with a robust 10 kW continuous output power. This means it can handle the ...
