

Generator air inlet cover lifting tooling

Why do I need an inlet cowl cover?

The Inlet Cowl Cover is used to protect inlet from foreign objects during parking and mooring. CAUTION Without the Inlet Cowl Cover, water, dust or wind can go inside the Engine. Water retention: accelerates corrosion. Dust: the Engine could be damaged during the ignition. Wind: allows blade rotation which may cause damage.

What is an inlet cowl sling?

The Inlet Cowl Sling is used to install or remove the Inlet Cowl from the Engine. This tool has a feature that allows the tool operator to rotate the Inlet Cowl and eases the installation on the Engine or placement on the Dolly. TEST Dedienne Aerospace has regional facilities to aid in the required annual testing and recertification.

Does insurance cover the E190-E2 aft engine mount sling?

This AFT Engine Mount Sling is a lifting tool and it is the only tool validated to lift the E190-E2 AFT Engine Mount. If the Engine Mount is lifted with another tool, and there is damage, the insurance may not cover the damage.
