How will GPGC power the new power plant in Ghana?

GPGC will power the new power plant in Ghana using advanced upgraded power plants transported from Italy. These power plants will utilize General Electric Sprint Gas Turbines (LM6000PD and LM6000PF). Both turbines have recently been fully serviced by General Electric. Together, they will provide a total of 107mw additional capacity into Ghana's power grid.

Which is the largest independent power plant in Ghana?

The Kpone Independent Power Plant, which achieved Commercial Operations on June 2019, is among the largest IPPs in the country accounting for approximately 10% of Ghana's total installed capacity and approximately 15% of its available thermal generation capacity.

How much power will General Electric provide to Ghana's power grid?

General Electric's recently serviced plants will add a total of 107mw into Ghana's power grid.

Is UBI group still a Ghanaian-owned company?

As much as I wanted the company to remain fully Ghanaian-owned, that marriage allowed us to finish the airport project and keep growing. Though UBI Group has downsized to 150 employees, yearly revenues are now more than \$400 million, with steady annual growth of 15% to 20%.

How many employees does solar energy have in Ghana?

It's still early days for the company, which has 20 employees and hasn't yet started generating revenues. But it's currently building two solar farms in Ghana with the goal of eight more by 2028 and has signed contracts to supply 3 million customers with 140 megawatts of clean energy by the end of 2023.

What role does GPGC play in Ghana?

GPGC has invested close to USD 100 million in Ghana to bring additional capacity to the country's power grid with the installation of the power plant project. The company is fully committed to supporting Ghana's economic growth and is building long-term partnerships with integrity.
