

Does Gibraltar need a cleaner liquefied natural gas (LNG)?

Until recently, Gibraltar's energy needs were 100% powered by marine diesel - so, a better solution was urgently needed - one that switches from diesel to cleaner liquefied natural gas (LNG).

Why does Gibraltar need a new power plant?

This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

Does Gibraltar need a new LNG terminal?

The new LNG terminal in Gibraltar consists of five double-wall stainless steel tanks, each with a capacity of 1,000 square meters. Michael Caetano, Chief Operational Officer of the Gibraltar Electricity Authority (GEA), explains, "Gibraltar needs a new, modern power plant. The existing plant is almost 40 years old."

Does Gibraltar have electricity?

Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).

Why does Gibraltar have a power station?

Through a remarkable feat of engineering, the power station on the North Mole in Gibraltar Harbor allows the quasi-island to continue its proud history of independence and self-sufficiency, regardless of what international politics hold in store.

Where is Gibraltar's new power station located?

The location of the new power station is on the North Mole in Gibraltar Harbor, an advanced arrangement of a gas-fired power station with an LNG hub which will serve as the basis of the island's future power supply.

GreenLine Energy priv?tperson?m pied?v? jaun?k?s paaudzes saules pane?u risin?jumu ar novietojumu gan uz zemes, gan jumta. Ir da??das sist?mas: t?kla un ?rpust?kla (off grid) jeb autonom?s. M?s varam nokomplekt?t sist?mu atbilsto?i katra cilv?ka v?lm?m un vajadz?b?m.

GREEN LINE ENERGY SA is part of Agrogroup Bozatzidis-Mitsiolidis, a leading company in the field of agricultural machinery and spare parts since 1984. Green Line Energy was established in 2011 with the aim of trading in, building and operating RES systems and biogas plants. Since 2011 it has built 430 PV parks, mainly for farmers and other ...

## Gibraltar green line energy

At GreenLine Energy, we are well versed in the specifics of solar systems specifically for business needs. We offer solar panel technology solutions for both self-consumption of energy and its sale on the electricity exchange Nord Pool. Our knowledge and experience allow us to develop a project for a configuration of virtually any complexity.
