

Green lantern solar Qatar

Who is Green Lantern solar?

Founded in 2011 on the principles of teamwork and trust, Green Lantern Solar is committed to delivering a clean energy future. We provide sustainable energy access to businesses, educational institutions, towns and municipalities throughout the U.S.

What is Qatar's Solar Energy Future?

Qatar's solar energy future is steadily developing. With average daily sunshine of around 9.5 hours, low-cloud cover conditions and plentiful space, there is great scope for small, medium as well as large-scale solar power projects in the country.

Is Qatar a good location for solar energy projects?

Qatar's Solar Energy Potential Qatar's high solar irradiance levels make it an ideal location for solar energy projects. The country enjoys a global horizontal irradiance among the highest in the world, averaging over 2,000 kilowatt-hours per square meter annually.

Why should you choose Green Lantern solar?

At Green Lantern Solar, we help communities preserve their land while generating sustainable energy locally. We ensure our solar installations are set back from roads, minimize construction waste and help farmers generate additional revenue to keep their farms in operation.

What is Qatar's energy mix?

The majority of Qatar's energy mix still relies on thermal generation, with the total thermal power capacity exceeding 12 gigawatts, accounting for over 90% of the country's total power generation capacity. Future Projects and Commitments

Why should CSP companies invest in Qatar Solar market?

Leading CSP technology companies are taking a keen interest in Qatar solar market and rapid developments are expected in the coming years. Qatar's foray in solar sector has been boosted by its emergence as regional R&D hub and ongoing transformation into a knowledge-based economy.

Vermont-based Green Lantern Solar recently completed construction of a 150-kW AC solar array in Stamford, Vermont providing Healthy Living Market & Caf²³³; with significant savings annually in net-metering credits. Sixty-six towns across Vermont now host Green Lantern arrays adding nearly 40 MW of in-state, renewable power to Vermont's grid.
