

Greenvolt power Pitcairn Islands

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

What is greenvolt power North America?

Meet the sustainable goals. Attain energy independence. Reduce electricity costs. Greenvolt Power North America tailors project specific measurements based on technology (wind or solar), local terrain, and size of the project to reduce uncertainty. This data is used to analyze and estimate energy production.

Is greenvolt a major development platform?

Greenvolt is now a European major development platform- a unique positioning in the renewables value chain Here are the latest key financial and operational figures. You can also download the Annual P&L and Balance Sheet.

What is greenvolt & why is it important?

The way we consume, produce and share our energy needs to change and Greenvolt wants to be a major contributor in this process. Greenvolt reduces waste and values forestry residues to create renewable energy with a positive impact in the economy and environment.

By efficiently pooling complementary clean generation technologies, it becomes possible to generate and deliver power to the grid in base load profile. Storage is quickly becoming a necessity to ensure energy equity - By guaranteeing grid security and providing a continuous flow of clean energy, storage ensures that all users have access to ...
