

# How to install the PV panels

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

How do you install PV panels on a house?

The most common method of installing domestic PV panels is mounting them to your rafters. This is done with custom hooks, aluminium mounting frames and specialist clamps. When a property is over one storey high, scaffolding is essential to gain roof access as the engineers need access to work on the roof.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

Can PV panels be installed on a roof?

PV panels can be attached to pitched roofs or flat roofs, fixed vertically onto external walls or located on the ground. You'll need a roof or wall that faces within 90 degrees of south, and isn't overshadowed by trees or build-ings. If the surface is in shadow for parts of the day, your system will generate less energy.

How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

MCS certification for solar PV installation. If you want to install solar PV panels in the UK, MCS accreditation should be on your radar. MCS, which stands for Microgeneration Certification ...

That being said, installing solar PV panels can be a lot of work, especially for the ordinary person. Here's a complete guide on how to install solar panels with ease. 7-Step Solar Panel Installation Process. Solar panel
