

How to write a good photovoltaic panel maintenance plan

What is a preventative commercial solar panel maintenance plan?

Once your commercial solar PV system is completed, commissioned, and the utility has granted your facility the permission to operate, your business should create a preventative commercial solar panel maintenance plan to monitor your solar system for atypical operations or production.

Do photovoltaic systems need to be maintained?

While photovoltaic systems generally require much less maintenance than other industrial equipment, having a solar preventative maintenance plan and protocols in place will save your facility time and money in the long-term.

How do I create a solar preventative maintenance plan?

One of the best places to start when creating a solar preventative maintenance plan is to review the project documentation supplied by your solar provider at the time of project completion. There, you should find the installation and inspection records from the installation, as well as the user manuals for your solar equipment.

Does your commercial solar system's preventative maintenance plan support warranty requirements?

Discover top tips and best practices from SunPeak's Operations & Maintenance team to ensure your commercial solar system's preventative maintenance plan supports your solar system's warranty requirements. A preventative maintenance plan is important for the longevity and success of your solar installation.

Do solar panels need maintenance?

Some solar panel installers offer maintenance as part of the purchase price, while others offer service plans for a separate fee. These service plans typically cover regular cleaning and maintenance to ensure the optimal performance of your solar panels.

What is preventative maintenance for solar assets?

Preventative maintenance for solar assets is a proactive strategy that reduces the chance of failure resulting in unplanned downtime. A preventative strategy can include scheduled cleanings, component replacements, and system repairs. Overall, it should increase the operational performance of the equipment.
