Range summary. HRESYS DE series is long life VRLA AGM battery. With corrosion resistance thick grid and advanced manufacturing technique, DE series delivers high reliability performance and long float service life up to 15 years, highly suited for telecommunication, UPS systems, IDC and other backup applications.

Our commitment to innovation ensures that each battery in the HP series is not only a testament to HRESYS's expertise in high voltage battery storage but also a critical component in the drive toward more sustainable and efficient energy solutions. Whether you are enhancing your industrial energy capacity or optimizing your renewable energy ...

The use of HRESYS" advanced LFP battery cells guarantees long lifecycle durability, enhanced safety features, and superior thermal stability, making it an ideal choice for diverse energy storage needs. Designed with flexibility and efficiency in mind, the HRESYS ESS-LFP-M Series stands as a versatile and future-proof solution for all your ...

HRESYS TL-LFP Series Lithium-ion Battery is a series of 36V/48V/51V battery packs integrates advanced LiFePO4 (Lithium Iron Phosphate) technology and smart integrated BMS with the ...

HRESYS TL-LFP Series Lithium-ion Battery is a series of 36V/48V/51V battery packs integrates advanced LiFePO4 (Lithium Iron Phosphate) technology and smart integrated BMS with the benefits of long cycle life, light in weight and compact in size, safety and environment friendly. TL-LFP Series Lithium-ion Battery can be used for a variety of ...

Range summary. H RESYS Large Container energy storage system (CESS) is for the demand of integrated energy storage system, with internal integration battery cabinet, battery management system (BMS), container monitor system, and can according to customer demand for integrated energy storage converter and energy management system.. HRESYS electrochemical energy ...

Introducing the HRESYS QW-N Series, an innovative line of kWh solar batteries designed to deliver exceptional performance and longevity. Our flooded maintenance-free starting batteries leverage cutting-edge technology and premium-quality materials, setting a new industry standard for reliability and efficiency in energy storage solutions.

The HRESYS ESS-LFP-M Series is a state-of-the-art energy storage solution designed to meet the versatile demands of today's energy landscape. Engineered with high-quality HRESYS Lithium Iron Phosphate (LFP)

battery cells, this modular battery module offers robust performance and reliability across various applications.

Range summary. HRESYS residential Energy Storage System is a highly integrated energy management system designed to provide families with smart photovoltaic and energy storage solutions. The residential energy storage system uses high-performance, high-safety LFP batteries and a reliable and efficient battery management system (BMS) with long service life. Highly ...

The Battery Management Unit actively balances the safety, life and performance of each cell, extending battery life. The modular system has multiple installation and is configured to minimise operation and maintenance expenses over the life of the project with all weather capabilities and high efficiency cooling system.

HRESYS Battery Energy Storage System (BESS) is designed based on high performance Lithium Iron Phosphate (LFP) battery rack, and it has also integrated with HRESYS Battery Management System, Thermal Management System, Alarming System, etc. It is compatible to most of the Power Conversion System in the market, and it is also provided with smart ...

Range summary. HRESYS SCG series is Superior Cycle VRLA Gel battery. By combining the newly developed nano gel electrolyte and high cyclic paste, SCG series delivers high cycle life, excellent high & low temperature performance, it is highly suited for renewable energy systems, outdoor telecom and other harsh environment require high cycle applications.

La serie HRESYS DFG (Duration Front Gel) representa un avance significativo en la tecnología de baterías de red. Utilizando nuestro electrolito Nano Gel recientemente desarrollado combinado con estructuras de estera de vidrio absorbente (AGM) de última generación, estas baterías están diseñadas para establecer nuevos estándares en rendimiento y confiabilidad.

The high-quality materials used in the HRESYS QW-N Series contribute to their robust structure, ensuring that these 100kWh battery storage units can withstand the demands of any environment. Trust in HRESYS to deliver power solutions that go beyond expectations, maintaining excellence in both performance and durability.

Hresys TL-LFP Series Lithium-ion Battery is a series of 48V battery packs utilizing advanced LiFePO₄ (Lithium Iron Phosphate) technology and smart integrated BMS with the benefits of long cycle life, light in weight and compact in size, ...

Range summary. HRESYS EVF series VRLA Battery is specially designed for electric vehicles and electric

Hresys battery Jordan

tools, including electric tricycles, electric automobiles, special electric vehicle and other devices require DC power source.

Introducing the HRESYS EVF Series VRLA Battery, the ultimate choice for utility battery storage needs. Engineered with precision, this series has been specially designed to serve as a dependable DC power source for a wide array of electric vehicles and tools.
