

Which countries invest in Hungarian EV batteries?

Investment in the Hungarian auto industry is being dominated by three countries - Germany, a champion carmaker, plus China and South Korea, EV battery leaders way ahead of European rivals.

What is the Hungarian battery industry platform?

On July 1, 2021, ZKK, in cooperation with the Ministry of Innovation and Technology, established the Hungarian Battery Industry Platform, which brings together more than sixty industrial, academic and public administration institutions. They began preparations to establish the Hungarian Battery Association.

Will Hungary become a 'great power' of battery production?

By the end of the decade, the factory will be churning out 100 gigawatt hours (GWh) of battery capacity each year. This would be enough to equip a million cars (based on current EV capacities) and make Hungary one of the main manufacturers in Europe -- in line with the government's plans to become "a great power" of battery production.

Will Hungary become a key producer of electric vehicle batteries?

Hungary wants to become a key producer of electric vehicle batteries. Government spending has attracted investments, including a new Chinese gigafactory.

When did the Hungarian battery Association start?

On July 1, 2021, the founding meeting of the Hungarian Battery Association took place with the participation of more than seventy companies. The establishment of the Hungarian Battery Association was the first significant step towards the realization of the strategic objectives of the domestic battery industry.

What does the Hungarian battery Association do?

The aim of the Association is to represent the interests of the companies active in the Hungarian battery value chain and to promote the development and European integration of the Hungarian battery industry by ensuring professional cooperation between governmental and institutional bodies.
