

Installing photovoltaic panels reveals information

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

Do you need a roof survey before installing solar panels?

Before getting solar panels, get a survey done or ask a solar company to do a roofing survey. There could be damage to your felt, lead or tiles [depending on your roof], or loose cement work. If you have a 70- or 80-year old roof, and you want to install solar panels, you may need some work done first."

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Do you need a solar panel system to be energy independent?

If you want to be fully energy independent, you will need more panels and a solar battery big enough to store the excess energy you generate. As long as you install a solar panel system powerful enough to cover your household's energy usage, you can rely on solar electricity for all your energy needs.

Should you install solar panels on a complex roof?

Installing panels on complex roofs can be more expensive due to the extra scaffolding and labour involved. If you decide to install a solar battery to store excess energy to use at a later time, this will also be an additional cost, separate from the solar panels.

Is it a good time to install solar panels?

Hopefully you feel more confident about the process of installing solar panels. With 69% of people telling our National Home Energy Survey that they're likely to buy or rent a home with solar panels, now is a great time to go solar.
