

Is it illegal to buy solar power yourself

Are solar panels legal?

However, it's crucial to understand that while installing solar panels is legal, certain conditions must be met. For most domestic properties, solar panel installations are considered a "permitted development" and do not require planning permission, provided they respect certain size criteria.

Are DIY solar panels legal in the UK?

Yes. UK law is pretty relaxed about DIY solar panels, and in most cases you don't even need planning permission to install a full-sized array of solar panels by yourself. But going DIY may mean you miss out on government schemes, product warranties and utility company support, because you won't have the necessary paperwork or certification.

Do I need permission to install solar panels?

Nevertheless, if your building is listed or located in a conservation area, you will need to seek specific permissions. It's paramount that any solar panel installation is carried out by the Microgeneration Certification Scheme (MCS).

Do solar panels void warranties?

Yes, self-installing solar panels can void warranties and may not be covered by your home insurance. Warranties and insurance policies often require professional, certified installation. Is it more cost-effective to install solar panels myself?

Will self-installing solar panels void a warranty?

This initiative opens a new channel for homeowners to receive financial compensation for contributing to a sustainable energy grid, further underlining the importance of professional installation to comply with legal and regulatory standards. Self-installing your solar panels could void warranties and insurance policies.

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.
