

# Is it okay to install photovoltaic panels on utility poles

Should I install my solar energy system on a pole mount?

But if you live in a remote location or otherwise have space, it may significantly reduce the installation cost by installing your solar energy system on a pole mount in an unused part of your yard. There may be other reasons you may want to consider a pole mount as an alternative to traditional flush mounts or solar racking on your roof.

Are pole mount solar panels a good option?

Pole mount solar panels are an excellent option when roof space is limited or unsuitable for solar panel installation. By utilizing vertical space, they provide an effective alternative and can be installed in areas with ample sunlight.

How do pole-mounted solar panels work?

Pole-mounted solar often incorporates solar tracking systems, which automatically tilt the solar panels to capture the optimal amount of sunshine. Tracking systems can increase the production of your solar panels by 25% or more. If you add trackers to your ground-mounted solar array, you can choose either a single- or dual-axis system.

Should you install solar panels on your roof?

Why consider pole mounts for your solar energy installation: If you live in the city and don't have much space, you are going to install home solar panels on your roof to conserve precious backyard space.

What is a pole-mounted solar system?

Pole-mounted solar systems support multiple solar panels on a single pole and elevate panels higher off the ground than a standard ground mount. Pole-mounted solar often incorporates solar tracking systems, which automatically tilt the solar panels to capture the optimal amount of sunshine.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.
