

Is it okay to install solar panels

Should you install solar panels at home?

Having solar panels installed at home sounds like an appealing idea. You get free electricity when the sun shines, potentially cutting your energy bills and doing your bit for the environment without having to give it much additional thought.

Can solar panels be installed on a roof?

Your installers will usually need to erect scaffolding to install solar panels on your roof. Once this is up, solar panels can be installed in a day or two. The inverter will usually be fitted in either a loft or garage. This converts the DC your panels produce to AC that you can use in your home.

Should you install solar panels again if you move home?

Imagining your house filled with mess from a lengthy installation could be enough to put you off considering solar panels. But few owners complained to us about the installation being disruptive, and 80% said that they'd install solar panels again if they moved home.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.

Should you add solar panel batteries to your solar system?

And, with the cost of solar panel batteries said to be gradually reducing, this is advantageous for homes that already have solar panels installed but that are thinking of adding batteries to their PV system to store excess energy.
