

Jersey solar system electrical panel

Why is solar important in Jersey?

Solar is a vital component of modern homes in Jersey, contributing to the state's renewable energy and energy management. For those focused on the bottom line, solar serves as a safeguard against rising grid electricity costs.

Is New Jersey a good place to install solar PV?

New Jersey is a national leader with regards to installed solar PV capacity, with more than 4.9 gigawatts (GW) from 200,000 individual solar PV installations. New Jersey has an interactive Solar PV dashboard that provides a summary of solar PV installations in New Jersey's counties.

Is New Jersey a good place to sit solar?

New Jersey is number two in the United States in installed solar PV capacity per square mile, therefore this Solar Siting Analysis Version 3.0 is timely as it provides the DEP, local communities and potential solar developers with state-level guidance on siting solar PV projects.

Why should you invest in solar energy in New Jersey?

The growth of solar energy in New Jersey has created thousands of jobs in sales, installation, manufacturing, and financing. By investing in solar, you're also investing in a new job market, supporting your local economy.

How do solar panels work?

Sunlight hits solar PV panels on a roof. Solar panels transform energy from the sun into direct current (DC), which flows to an inverter. The inverter converts the electricity produced by the solar panels from DC to alternating current (AC). Energy from converted AC is used to power your home.

What is a net metered solar system?

Residential and Non-Residential solar systems are typically net metered, meaning when the solar system produces more power than your facility is using, your electric meter will spin backwards, and your account will be credited for the excess power sent back to the local grid.

For a solar system producing over 11,000 kWh per year, that adds up to \$14,025 over the life of the program -- effectively reducing the net cost of the system to \$6,841. How long do solar panels last in New Jersey? Most solar panels are warranted to last 25-30 years but have the ability to continue producing electricity for much longer.

If you purchase a solar system from NJ Solar Power, we must do the installation. We do not sell retail or wholesale solar systems. Does your installer offer a turn-key solution that includes all paperwork and filings? As part of our comprehensive service, NJ Solar Power will obtain all local permitting, state filings, and approvals.

Jersey solar system electrical panel
