

How will Liberia achieve universal access to electricity by 2030?

The country will need to invest heavily in energy infrastructure to achieve universal access to electricity by 2030. The primary energy sources in Liberia are traditional biomass fuels such as firewood and charcoal, which account for more than 80 % of the country's total energy consumption [5,12,13].

What are the opportunities for energy access in Liberia?

Additionally, adopting off-grid and mini-grid solutions presents another opportunity for energy access in Liberia. Given the challenges of extending the central grid to remote areas, off-grid and mini-grid systems offer cost-effective alternatives. Some of the energy sources utilized in Liberia are summarized in Table 3. Table 3.

What are the challenges to energy access in Liberia?

The primary challenge to energy access in Liberia is the limited and underdeveloped energy infrastructure. The lack of adequate power generation, transmission, and distribution systems contributes to this low access rate. The electrification rate is significantly lower in rural areas, where most of the population resides.

How can Liberia reduce its dependency on imported fuels?

To overcome these challenges, Liberia has been exploring alternative solutions to reduce its dependency on imported fuels for thermal power generation. One strategy is to diversify the energy mix by increasing the share of domestic renewable energy sources, such as solar and wind power, for electricity generation.

What infrastructure does Liberia need?

In terms of infrastructure, Liberia has yet to develop full national backbones of paved roads, power transmission and fiber optic cable (figures 3a-d).

How much does infrastructure cost in Liberia?

Meeting these illustrative infrastructure targets for Liberia would cost between \$615 to \$345 million per year through 2015, depending on the standards applied. Capital expenditure would account for 80 percent of this requirement. Power and transport each account for about one-third of the total (table 10).

The Government of Liberia through the Civil Service Agency (CSA) has launched a Headcount exercise at the Central Offices of the 103 Spending Entities (SE). The headcount is part of Employee's Status Regularization Project (ESRP) that is coordinated by Mr. Isaac G.F. Gorvego, the Director of the Research Strategic Planning, Monitoring, and ...
