

Lithuania eleXsys energy

Does Lithuania need a new energy system?

Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025.

What is eleXsys energy?

eleXsysEnergy is the developer and manufacturer of the eleXsys technology, an innovative and award-winning solution to voltage issues that can be created by clean energy producers - such as solar energy systems - trying to send energy back to electricity grids that were designed to send, not receive, energy.

Is eleXsys a good company?

EleXsys' technology has also won a number of local and international accolades, including in 2021 the Award for Energy & Renewables at InnovationAus' inaugural Awards for Excellence and first prize in the Renewable Energy Category at the 2021 Davos Energy Week Awards.

Where is eleXsys energy located?

eleXsys Energy established offices in the USA, Europe and the Asia Pacific, and new partnerships to enable rapid global expansion. An international investment banking and financial services company was engaged to assist with capital raising and more award wins were achieved.

What is eleXsys & why should you use it?

“It's (eleXsys) an invaluable asset even for utilities that aren't yet facing curtailment challenges - eleXsys can be installed either behind-the-meter or front-of-meter, making it an effective solution for multiple kinds of users and energy-market structures.

The IKEA eleXsys Microgrid is combining commercial-scale rooftop solar and batteries with eleXsys technology to create a new model for renewable energy systems. In November 2021, the Australian Government announced financial support of \$3.5 million to assist in building eleXsys Energy's first dedicated Australian manufacturing facility.
