

Lower 48 Energy Lytham is the first project Lower 48 Energy BESS Limited originated. Lower 48 Energy first filed the grid connection application in June 2021 and received and accepted the full grid offer in January 2022. Since then, we have exchanged the contracts for an Option Agreement and on the Lease for a period of 35 years with an option ...

Our team is comprised of long-standing energy sector professionals, proven in the development and deployment of large-scale energy projects, energy experts with in-depth knowledge of energy markets and consulting, electrical ...

About Lower 48 Energy BESS. Lower 48 Energy BESS develops battery energy storage systems (BESS). The company's main service involves storing excess electricity in their BESS assets, which is then sold into the National Grid to meet various electricity demands, helping to balance the peaks and troughs of electricity pricing caused by supply and demand imbalances.

Lower 48 Energy BESS Ltd is currently progressing a proposal for a BESS development at the site with the intention to submit a Section 36 Application under the terms of the Electricity Act 1989 at a later date. We will accept any further comments until 6th December 2024. All comments will be recorded and addressed within our consent application ...

Explore the world of battery and solar development with Lower 48 Energy Ltd through our comprehensive FAQs. Learn how our Battery Energy Storage System (BESS) operates seamlessly to balance daily demand, contributing to a greener, more sustainable energy future. Discover the significance of commercial BESS as a "green generation enabler," leveling out ...

Read about our Service. Lower 48 Energy BESS Ltd seeks to capitalise on the growing intraday supply and demand imbalances caused by the UK's ever increasing reliance on renewable energy by developing Battery Energy Storage Solutions to reach net zero carbon. Battery Energy Storage Systems (BESS) has emerged as one of the dominant solutions to increase grid system ...

Follow the early development of the Glenapp Project by Lower 48 Energy, strategically located just to south of the hamlet of Smyrton, South Ayrshire. Engage with our ongoing refinement process, allowing early stakeholder and community involvement to address constraints and leverage opportunities. Explore the site's suitability for battery storage, considering landscape, ...

Chairman & CEO at Lower 48 Energy &#183; Managing Director at Lower 48 Energy. I serve as the Board Chairman of Lower 48 Energy and Lower 48 Energy BESS, and work with my highly experienced team, and anchor investors to work tirelessly on building out a 250MW BESS portfolio of assets in the UK within the

Energy storage solution provider Trina Storage has signed an agreement with Lower 48 Energy to deliver a 98MWh BESS project at a two-acre site in Preston in the UK. ? The implementation makes use of the vertically integrated Trina Storage Elementa system, featuring Trina Storage's second-generation proprietary cells. ? Deliveries are scheduled for the fourth quarter of 2024, ...

LONDON - December13, 2023 - Castleton Commodities International LLC (CCI) announced today that a subsidiary has acquired a majority stake in Lower 48 Energy BESS Ltd. (L48Energy), a company that originates, builds, owns and ...

Lower 48 Energy BESS is a UK based business that operates across the Battery Energy Storage Systems (BESS) landscape. Our engineers study the entire National Grid and the local Distribution Network Operators grids to identify viable and advantageous locations to build battery assets. Once we have identified a location, we then work with our ...

Lower 48 Energy Upper Greenfields 1 BESS is an important project in our self originated pipeline. Lower 48 Energy Upper Greenfields 1 BESS is strategically located immediately adjacent to the National Grid New Deer 2 Substation. New Deer 2 400 kV Substation forms part of ScotWind and is the onshore landing substation of Offshore wind generation ...

Trina Storage, the leading global energy storage solution provider and business unit of Trinasolar, has signed an agreement with Lower 48 Energy to deliver a 98 MWh BESS project at a two-acre site in Preston in the UK.

Lower 48 Energy proposes a strategic 200 MW BESS development at Upper Greenfields, near the proposed Greens SSE Substation. This project, with containerized Li-ion batteries, aims to store excess renewable energy and stabilize the grid, supporting the UK's net zero goals and decarbonization targets. ... The BESS projects would be able to store ...

Lower 48 Energy has received and accepted a National Grid Electricity Distribution (NGED) grid connection offer to energise a 99.9 MW / 199.8 MWh BESS project. ... Lower 48 Energy Shrewsbury BESS forms a part of our strategic self-origination pipeline and is expected to begin construction at the back end of this decade.

Lower 48 Energy Glenapp BESS is a 200 MW, 400 MWh BESS project of strategic importance located adjacent to Moyle Interconnector. Moyle Interconnector is a very important 500 MW interconnector that connects Scotland to Northern Ireland. Lower 48 Energy Glenapp BESS would connect to a new proposed Substation "Lower 48 Energy Glenapp BESS" that would in turn be ...

About L48 Energy Lower 48 Energy BESS is a UK based end to end Battery Energy Storage Systems developer focusing on developing large scale, strategically located BESS assets. We are motivated to rapidly develop an operational portfolio that is of importance to the UK's electricity grid.

Lower 48 Energy Dams of Craigie BESS forms part of our ambitious organic pipeline of developing projects in areas of strategic importance. We selected the site in North Aberdeenshire after careful consideration and detailed due diligence. We had approached National Grid in July 2022 for a pre application meeting regarding our intention for connecting a 200 MW BESS co ...

Discover the importance of Battery Energy Storage Systems (BESS) with Lower 48 Energy's Dams of Craigie project in Aberdeenshire. This strategic initiative combines a large-scale BESS and Solar PV Array to stabilize the UK electricity grid, addressing the challenges posed by the transition to renewable energy. Explore how BESS assets help manage electricity demand, ...

Follow the early development of the Dams of Craigie Project by Lower 48 Energy, strategically located in Kingseat, Aberdeenshire. Engage with our ongoing refinement process, allowing early stakeholder and community involvement to address constraints and leverage opportunities. Explore the site's suitability for a solar array and battery storage, considering landscape, ...

L48 Upper Greenfields I BESS. L48 Upper Greenfields II BESS. news. Careers. Contact. NEWS. Lower 48 Energy has secured exclusivity rights to develop the Barton BESS. About Author. Blair has over 20 years" experience in the construction industry, specialising in leading complex programmes across multiple asset classes.

14 Dec 2023 Slaughter and May advised Castleton Commodities International LLC ("CCI") on its subsidiary's equity investment in Battery Energy Storage Systems development company, Lower 48 Energy BESS Ltd ("L48 Energy")

Lower 48 Energy intends to reach a Final Investment Decision by January 2024 and would start construction soon thereafter. The BESS solution would utilise LFP chemistry of Lithium-Ion Batteries and comprise of 46 Container Units with 8 ...
