

Can Malaysia reach a 50% renewable share in electricity generation?

According to the Energy Commission, to reach a 50% renewable share in electricity generation, Malaysia would require a total investment of around USD 6-11 billion. Solar PV would play a crucial role in this.

Is Gita a good option for Malaysia's Energy Transition?

GITA, concluding at the end of 2023, has been a helpful mechanism for cash flow, providing tax relief for a period of 13 years. Ensuring financing of renewable energy investments remains an important barrier to accelerating Malaysia's energy transition.

What is the solar PV market in Malaysia?

While the solar PV market in Malaysia is dominated by grid-connected PV systems driven by the LSS programme, the distributed renewable energy market is also growing thanks to the Net Energy Metering programme.

Who is responsible for electricity generation in Malaysia?

In Malaysia, electricity capacity is shared between independent power producers (IPPs) and the power generation arm of Tenaga Nasional Berhad (TNB), Malaysia's largest electric utility company. Besides generation, TNB is also responsible for the transmission and distribution of electricity.

Who regulates electricity and gas in Malaysia & Sabah?

The Energy Commission (Suruhanjaya Tenaga, ST) is responsible for regulation of all electricity and gas issues in Peninsular Malaysia and Sabah.

How can Malaysia transform its energy system?

Utilise the long-term opportunities of the energy transition - through the development of cohesive and integrated long-term energy planning strategies. Malaysia has taken important steps to transform its energy system to a more secure, clean and affordable one in the future.
