What is a grid-tie solar inverter?

With a grid-tied solar inverter, you can convert the DC electricity from your solar panels into AC electricity used in your home. There are many grid-tied inverters available, which makes finding the best grid-tie inverter tough! That's why we put together this grid-tie inverter review--so you can find the best solar inverter for you.

Are grid tie inverters worth it?

Grid tie inverters are a great cost-saving addition to your home solar system, but they don't often come cheap. If budget is your primary concern, then you'll be glad to know there is a trustworthy brand out there with a grid tie inverter just for you. Y&H have produced this micro-inverter to cover conversion of DC power up to 350 watts.

How do grid tie inverters work?

This process is called Net Metering. Moreover, grid tie inverters are designed so that they need only match the grid's waveform and voltage, rather than having to match a wide variety of different appliances. (The overall process is made that bit simpler, in other words.)

What is a pure sine wave grid tie inverter?

Pure sine wave grid tie inverters are located between your renewable array and home. The electricity produced by renewable technology is Direct Current (a straight line, going only one way), whereas the grid's electricity is Alternating Current (a wavy line going both directions).
