

Mole energy ltd Mauritius

Who is mole energy?

When we founded Mole Energy in 2010, we were driven by our shared passion for renewable energy and a commitment to building a company rooted in integrity and expertise. From the outset, we knew we wanted to make a positive impact on the environment and work tirelessly to do right by our customers and the planet.

Why should you choose mole energy?

Today, we're extremely proud of this DNA that runs through Mole Energy, and we know that our customers and team feel the same way. Mole Energy delivered a first-class service from start to finish. They completed the installation in four hours and their team were polite and respectful.

How long does it take mole energy to install solar panels?

Mole Energy delivered a first-class service from start to finish. They completed the installation in four hours and their team were polite and respectful. Our solar panels look really smart and we're constantly checking the App to see how much energy they're generating. Speak to our team and start saving on energy in under 6 weeks.

Where can a mole ground unit be installed?

The MOLE ground unit can be installed anywhere- indoor, outdoor, above ground, underground and on street. Park and MOLE does the rest. No cables, no trip hazards and no man handling required. Vehicles can be easily adapted to support MOLE charging post registration. Adapter is reversible and retains use of the existing OEM charging port.

Why should I upgrade my mole ground unit?

Power capacity of your MOLE ground unit can be upgraded as you grow your electric fleet to meet your net zero ambitions. Automated robotic charging ensures fast, reliable and efficient charging. MOLE is a fully autonomous, robotic charging device that enables businesses to accelerate their transition to a fully electrified fleet.

Can a vehicle be adapted to support mole charging post registration?

Vehicles can be easily adapted to support MOLE charging post registration. Adapter is reversible and retains use of the existing OEM charging port. Power capacity of your MOLE ground unit can be upgraded as you grow your electric fleet to meet your net zero ambitions. Automated robotic charging ensures fast, reliable and efficient charging.
