Their innovative climate projects use climate finance to subsidise the cost of solar lights for customers in rural areas who cannot afford solar. Namene tackles emissions from kerosene lamps and provide truly affordable energy access with carbon credits, generated by the mass deployment of our award-winning solar lights.

In addition to Gold Standard's requirements, we apply a stringent internal audit process which goes beyond these requirements - with higher frequency monitoring and surveys, increased product warranty periods, and ongoing customer engagement campaigns to guarantee the emissions reductions created by our projects.. We use a customised digital tool that captures ...

Zambia was Namene's first carbon project, which has since seen almost a quarter of a million solar lights delivered across all ten provinces since 2021. This rapid growth was underpinned by our trailblazing strategy to make solar lights affordable and accessible to all. Understanding the carbon value of a solar light
