

Namibia has already engaged its first investor, awarding Hyphen Energy preferred bidder status for US\$4.4 billion (the fDi Report 2022, Financial Times). Investment opportunities in the Green Hydrogen sector A number of opportunities exist in maximising the value chain upstream and downstream. Upstream

Namibia is ideal for continued physical distancing. Once thoroughly advised on tire replacement costs, punctures and wheel-changing methods, I hit the road in an outlandishly lime green Suzuki Jimny 4WD rental car from Namibia2Go - one among 14 vehicles waiting for the first return travelers. "We are slowly getting more tourists, especially ...

View Christine Mbanacho's profile on LinkedIn, a professional community of 1 billion members. ... By 2030, we aim to generate at least 80% of our electricity needs within Namibia. This ambitious goal ...

We expect costs in Namibia to be equally low. Namibia intends to be able to export green hydrogen even before 2025. Due to the country's low population density and moderate population growth, Namibia will be able to meet its own demand for renewable energy and green hydrogen quickly and thus cross the export threshold relatively fast.

In 2009, Sun King sold its first solar-powered lamp. Today, Sun King is the world's leading off-grid solar energy company. Sun King's 3,000 employees and 26,000 field agents have served 120 million product users based in 65 ...
