New Zealand's large-scale solar PV market is poised for a momentous shift with energy company Todd Generation pursuing plans to establish a 400 MW solar farm at Rangitiki on the North Island.

You might be wondering what the size of a typical solar system is on a dairy farm. Well, every situation is unique, and we tailor our systems to the farm's requirements, but generally we look at larger dairy sheds running at around 800-1000 cows during milking. This gives an average monthly running cost of \$2000-\$3000, around 200-400kWh/month.

Ten large-scale solar farms planned for New Zealand's North and South islands are among 22 renewable energy projects with a combined capacity of 3 GW that have been listed for inclusion in the ...
