

News about Yunlan photovoltaic panel fraud incident

Did a high-ranking Chinese solar panel executive commit a white-collar crime?

A high-ranking executive of a Chinese solar panel maker was arrested on arrival at Munich airport in Germany accused of white-collar crime dating back several years to now-defunct EU trade measures against the Asian giant.

Are Chinese detainees forced to produce solar panels?

In state-sponsored programmes, detainees are forced to produce goods including polysilicon, a core ingredient in solar panels, according to the US Department of Labor. The Chinese government has always staunchly denied all allegations of human rights abuses in Xinjiang.

Are Chinese solar panels unfair competition?

Longi Green Energy Technology Co. solar panels on the roof of an office building in Xi'an, China, pictured in March 2023. The European Union has launched investigations into two groups of companies that include Chinese solar panel makers in the latest salvo against what it suspects is unfair competition from China's vast manufacturing sector.

Are Xinjiang solar panels a 'forced labor'?

Calls to Hoshine were not answered late on Thursday in China. Xinjiang companies, including makers of polysilicon products, have repeatedly denied that the region's labor transfer programs amount to forced labor. Allegations of forced labor in the solar panel supply chain have created a dilemma for U.S. officials.

Are Xinjiang solar panels exploitation of Uyghur Muslims?

The production of solar panels in the Xinjiang region has been linked to the alleged exploitation of Uyghur Muslims. The British Army is investing £200m in solar panels across four of its sites. The Ministry of Defence listed JA Solar, Trina and Qcells as the solar panel suppliers in response to a BBC Freedom of Information request.

Why did China stop making solar panels in Europe?

But the policy was eventually abandoned as Chinese manufacturers quickly built manufacturing plants in Southeast Asian countries to circumvent the EU's restrictions - while almost no European panel makers were left anyway, and the measure also drove up solar panel prices in Europe, harming solar installers and other players in the supply chain.

According to the summaries of [2, 5-7, 12, 14-33], the main causes of PV fires are shown in Figure 2. There are 36% fire events due to installation errors, 15% accidents because
