

# Niger integra infrastructure

What is Niger's infrastructure funding gap?

Niger's infrastructure funding gap amounts to \$460 million per year, or about 14 percent of its GDP, once efficiencies are captured. This overall gap is predominantly in water and power, but also in the ICT, irrigation, and transport sectors (table 20). Table 20. Funding gaps by sector Source: Derived from Foster and Brice&#241;o-Garmendia (2009).

How important is infrastructure in Niger?

Between 2000 and 2005 infrastructure made a net contribution of only 0.3 percentage points to the improved per capita growth performance of Niger, one of the lowest in Sub-Saharan Africa.

How much does infrastructure cost in Niger?

Meeting these illustrative infrastructure targets for Niger would cost \$747 million per year over a decade. Capital expenditure would account for 71 percent of this requirement. Water supply and sanitation is the sector with the highest spending needs and will require an estimated \$266 million per year.

How does the infrastructure of Niger compare with the average?

Our listing of the primary types of transport compares the infrastructure of Niger with the average of all countries in Africa. In many places, the traffic routes show considerable deficiencies and are often not in a particularly good condition. The network of roads and highways has a total length of 18,949 km.

Why is infrastructure development difficult in Niger?

Niger's demographic characteristics and distribution patterns make infrastructure development difficult. Niger is a large country with an area of approximately 1'267,000 square kilometers (km<sup>2</sup>), but only one-third of the area in the southwest is arable. The country's population of 15.3 million is concentrated in this arable strip (figure 3a).

Is Niger a good place to invest in infrastructure?

When compared to other African peers, Niger has failed to attract a significant amount of private finance for infrastructure (figure 27). Over the early 2000s, Niger captured private investment commitments worth only 0.8 percent of its GDP, predominantly in the ICT sector.

Africa-Press - Niger. L'analyse des actions pos&#233;es dans le domaine des infrastructures routi&#232;res r&#233;v&#232;le que les efforts faits ont permis d'am&#233;liorer sensiblement les indicateurs d'effet du domaine. Ainsi la densit&#233; routi&#232;re est pass&#233;e de 11,23 km/km<sup>2</sup> en 2020 &#224; 11,29 km/km<sup>2</sup> en 2021 traduisant une l&#233;g&#232;re progression du r&#233;seau.

Ces investissements sont ax&#233;s sur la construction d'infrastructure et le renforcement en personnels qualifi&#233;s. Malgr&#233; l'acc&#233;l&#233;ration de la croissance d&#233;mographique qui a souvent

annihil&#233; les efforts du gouvernement on note une progression de la couverture sanitaire ascendante depuis 3 ann&#233;es successives.
