

Holcomb Energy Systems" patented technologies operate using this optimum material to harness the spin of electrons in iron atoms, producing five units of energy output for every single unit of input. Given the abundance of iron and low-cost production methods of the electrical steel alloy, this redesign will have a profound impact on the ...

In late 2021, Incite Energy were appointed to review the operations and systems within the Norfolk Island Regional Council (NIRC) electricity business unit (NI Electricity) and implement changes to transition the island to an electricity grid dominated by renewable energy, allowing electricity tariffs to be reduced.
