The Liebert® RX remote power distribution cabinet supplies packaged power distribution in the smallest possible footprint, with 400 Amp and 84 poles in one panelboard, and only requiring 24"x12" of space. It offers monitoring options and multiple configuration possibilities to fit the needs of most data centers.

The influx of client/server rack equipment is changing the content of data centers. There are more devices than before, and they consume less power than their predecessors. Therefore most Power Distribution Units (PDUs) run out of circuit breaker poles before they run out of rated capacity. The Liebert RDC extends the functionality of the PDU by packaging 168 poles (four ...

Provides high quality, flexible power distribution for high-density data centers. It is engineered to combine the convenience and cost savings of a pre-packaged, factory-tested unit with the flexibility of a custom-tailored power system. This self-contained system provides power isolation, power distribution, computer-grade grounding and power monitoring.

North Macedonia power control cabinet

The new Government of North Macedonia intends to switch the 210 MW thermal power plant TEC Negotino from fuel oil to natural gas. The oil-fired facility is on cold reserve for the country's power system. Negotino, a state-owned power plant, is paid to be prepared to start generation very fast if there is a need.
